Work Experiences

Senior FullStack Engineer - Kaufland e-commerce

March 2025 - Present / Remote

Backend technologies: Go, nodejs, PHP, MySQL, Redis, Kafka

Frontend technologies: vue@2, vue@3, single-spa, typescript, scss

Others: Kubernetes, Helm, Gitlab CI/CD, Google Cloud, Claude Code

My responsibilities:

I lead complex initiatives that require strong technical judgment and cross-team communication skills. I support my team across both frontend and backend development tasks, and I am responsible for driving design and architectural decisions within our team.

Senior FullStack Engineer - gis-consulting GmbH

June 2020 - February 2025 / Hybrid - Trossingen, Germany

Backend technologies: C# (dotnet), nodejs, GraphQL, neo4j, PostgreSQL, SQL Server, redis, Kafka, elasticsearch, xUnit Tests

Frontend technologies: vue@2, vue@3, single-spa, typescript, scss

Others: Kubernetes, Helm, Gitlab CI/CD, Azure, Open-Telekom-Cloud, On-Premise Kubernetes instances

My responsibilities:

This is where I grew the most as a developer and team lead. I led the migration of a monolithic application to microservices, overseeing the architecture, development, and deployment of the new services, as well as managing the CI/CD pipeline and Kubernetes deployment. I was also responsible for the development of the new frontend and mentored my teammates throughout the process.

Web Developer - NavaTec GmbH

August 2016 -May 2020/ [Remote, Iran](#) - [On-Site Heilbronn, Germany](#)

Backend technologies: C# (asp.net mvc), PHP (Laravel), MySQL, PostgreSQL, Elasticsearch

Frontend technologies: jQuery, bootstrap, vue@2

My responsibilities:

Here is where I started the journey of working with an international team. I was responsible for the development of a new SaaS, from the backend to the frontend, and the deployment of the application to the cloud.

Full stack developer - Freelancer

~August 2012 -September 2016/ [Iran](#)

My responsibilities:

During university since I could only learn by doing, I started taking projects as a freelancer while I was in Iran. I haven't listed the techs I worked with because it was a wide range of them. Just wanted to point it out after a while, I found my path towards web development and continued it for the next 10 years of my life and it continues.

Educations

Jahrom University - Bachelor

September 2009 -June 2015/ [Jahrom, Iran](#)

I started studying software engineering in Jahrom University for almost 6 years. The 6 years of studying has been because I wanted to also learn this field not just theoretically but also practically. I was working as a freelancer with different companies in Shiraz, Iran. But I don't think software engineers will ever graduate.

About me

All the skills and knowledge I have gathered all these years could not be possible without a passion for continuous learning and improvement.

I had the chance to be surrounded by really talented individuals from different parts of the world to understand different mindsets and point of views and of course value a constructive environment.

In any company or projects I have participated in, I have always tried to leave a footprint and make sure all my colleagues even without me can still continue and be successful. In the past five years, I have been focusing on developing enterprise level products. This has made me more patient and careful while I still am courageous enough to try something new and make sure the code base or product will not suffer deprecation in the short term. In short, I still can have a lot of fun while maintaining or migrating or building a product. I have never limited myself only to the company I have worked with. I also enjoy contributing to the community and helping others improve. My latest example for this which is also something I am really proud of is **Neo4j.Berries.OGM** which is an object-graph-mapper for neo4j in dotnet. This passion comes from love/talent or whatever society calls it, I deeply enjoy solving problems and providing for my team. With all this being said, I look forward to meeting you and having a great conversation together!

Sincerely,
Farhad
